

ADIT RAJARAM NAVLE

Full Stack Engineer | Node.js • Angular • React Native | AI/LLM Integrations | Mobile Release Pipeline
Mumbai, India | aditnavle@gmail.com | +91-9136797633 | linkedin.com/in/adit-navle-561872280 | github.com/aadi-commits

PROFESSIONAL SUMMARY

Full Stack Engineer delivering production apps end-to-end — frontend, backend, mobile. Track record across healthcare, automotive, CRM, and AI-powered products.

KEY HIGHLIGHTS

- Shipped 911Care healthcare app to Google Play with video consults, push notifications, and full Android release pipeline
- Reduced frontend load times by 60% via Angular bundle optimization, lazy loading, and redundant API call elimination
- Built AI symptom assistant embedded in live booking flow + production RAG pipeline with pgvector for context-aware LLM responses
- Dual-stack backend: Node.js/Express/MongoDB + Java Spring Boot/PostgreSQL with RBAC and SOLID architecture

PROFESSIONAL EXPERIENCE

Software Developer — Full Stack & Mobile | Onelife Capital Advisors Ltd., Mumbai | May 2025 – Present

- **Frontend Performance:** Redesigned Angular bundle pipeline with lazy loading and eliminated redundant API calls, cutting load times by 60% across production
- **Automation:** Built backend service generating PDF invoices and sending them via WhatsApp for post-purchase order notifications
- **Cross-Product Analytics:** Built API aggregating user activity across company products (healthcare, automotive, CRM, and others) to surface subscription and purchase data, enabling targeted lead outreach for upsells and feature adoption
- **Mobile App Shipped:** Built end-to-end patient consultancy journey in 911Care (Ionic Angular + Capacitor) — booking, Zoom video SDK, FCM push notifications with 15-min reminders, consultation history
- **Android Release:** Owned full pipeline — Gradle builds, signed AAB/APK, AndroidManifest permissions, Google Play Console deployment from test track to production
- **API Optimization:** Eliminated N+1 DB calls, optimized MongoDB indexes and payload contracts, reducing latency on high-traffic Node.js/Express endpoints
- **Migration Lead:** Leading migration of 911Care from Ionic Angular to React Native using Claude agentic AI tooling in VS Code, maintaining feature parity

MEAN Stack Developer Intern — Full Stack | Onelife Capital Advisors Ltd., Mumbai | Nov 2024 – May 2025

- **AI Integration:** Embedded third-party AI API mid-booking flow, parsed structured medical responses, rendered contextual precaution guidance on Angular UI
- **Backend Development:** Designed and implemented Express.js REST APIs with middleware, validation, and structured responses
- **Bug Reduction:** Resolved critical and regression bugs across Angular web platform, reducing user-facing errors in key product flows

TECHNICAL SKILLS

Backend: Node.js, Express.js, Java Spring Boot, REST APIs, Prisma ORM, JWT, OAuth, Spring Security, RBAC, middleware, Microservices

Frontend & Mobile: Angular, React, Ionic, React Native, Capacitor, HTML5, CSS3, TypeScript, JavaScript, Zoom Video SDK, FCM push notifications, WebSockets

Databases & AI: MongoDB, PostgreSQL, MySQL, Redis, pgvector, RAG pipeline, LLM API integration, vector search, Claude agentic AI, SQL

DevOps & Tools: Git, GitHub Actions, Docker, Gradle, Google Play Console, Postman, Swagger, Agile/Scrum, SDLC, Jira, Render, Netlify

Testing: Jest, Unit Testing, Integration Testing

Cloud: AWS (basic), CI/CD pipelines

PROJECTS

AI Customer Support Agent | Node.js, Angular, PostgreSQL, pgvector, Prisma, RAG | June 2026 – Present

Building RAG pipeline with document embeddings stored in pgvector for semantic search and context-aware LLM responses. Node.js backend with Prisma ORM, Angular frontend, full-stack architecture.

D-Duty — Duty Management System | MEAN Stack (MongoDB, Express, Angular, Node.js) | May 2023 – Sept 2023

Built duty assignment and scheduling system replacing manual shift management with real-time notifications and digital task allocation.

Donor Management System | Java, Spring Boot, PostgreSQL, JPA/Hibernate, Spring Security | 2025 – 2026

Full donor lifecycle backend with multi-stage approval workflows, RBAC, layered architecture following SOLID principles.

EDUCATION

B.Sc Computer Science — University of Mumbai | Graduated 2024 | CGPA: 8.5/10
